

EXPRO

Pipeline Pigging & Support Services

In a competitive market, are you getting the engineered experience offering cost-saving advantages and increased operational efficiency for your pipeline pigging and support services?

We offer a full range of service capabilities, including:

- Separation & Filtration
- Pipeline Cleaning & Conditioning
- Engineered Solutions
- In-House Laboratory
- Pipeline Velocity Control

Pipeline Maintenance:

- Temporary facility installations
- Plant / Refineries
- Pipeline decommissioning/recommissioning
- Troublesome product or contaminant
- Corrosion inhibiting and biocide / biostatic treatments

Pipeline Cleaning & Conditioning

- Pre / Post ILI Smart Pig runs
- Restricted flow improvement
- Contaminant removal
- Scale, asphaltene, wax / paraffin, sediment, water, condensate
- Pipeline-specific and contaminant-targeted cleaning chemicals
- Pipeline and pig velocity control systems

Pipeline Integrity

- Online in product – Offline in nitrogen, air, or water
- Regulatory Inspections
- 24/7 Emergency Response

Storage Facilities

- Circulation & Product Swap
- Monitoring/Maintaining
- Bleed downs
- Tubing pulls
- Communication issues

From gathering lines to disposal and anywhere in between, Expro provides safe, efficient and effective pipeline services to meet the needs of our customers in any operation, anywhere in the world

We deliver pipeline solutions that focus on efficiency to effectively capture contaminants and proficiently gather valuable data, with the utmost regard for jobsite safety and environmental impact.

Strengths

Dedicated, pipeline-specific equipment providing high-capacity pipeline separation and filtration services.

- Largest global fleet of innovative, reliable flow management equipment
- Full pipeline flow product separation
- Full pipeline flow product filtration
- True multi-phase separation
- Temporary pig launchers and receivers & bolting / torquing
- Trailer mounted equipment
- Servicing both gas and liquid pipeline systems

Strategic Advancements

Fully integrated solutions starting with pre-job engineering and planning, project execution and management, and final report with future recommendations.

- Velonix™ adaptive pipeline and pig velocity management system
- Experienced Project Managers and in-house Midstream Engineers to plan and execute complicated job scopes
- Customized turn-key pigging plans
- In-House laboratory and analysis
- Cleaning and anti-corrosion chemicals
- Pipeline pigs
- Pig launch and receive including on-site decontamination and testing
- Experienced pipeline separation, filtration, and cleaning personnel
