

# Data Analysis Centre

Transforming data into value across  
the well and reservoir lifecycle

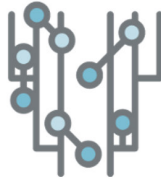

## Well Intervention Solutions

### Well Performance

Maintaining &  
Optimizing  
Production

### Well Integrity

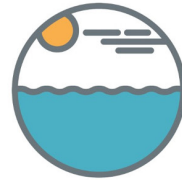

Safer,  
Sustainable  
Production

### Field Life Extension

Maximizing  
Economic  
Recovery

### Well Abandonment

Responsible  
& Safe  
Closure

## Our Aim

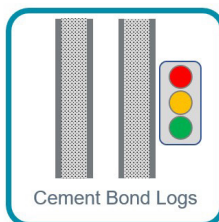

To provide across lifecycle Geoscience support to our clients through:  
**Consultancy, Modeling, Interpretation, Quality Control and Training.**

**Expro's Data Analysis Centre (DAC)** transforms subsurface data into actionable insight, helping clients make faster, more informed decisions across the well lifecycle. From reservoir evaluation and integrity monitoring to production optimization and abandonment, DAC delivers expert geoscience support and advisory services - leveraging advanced work flows, including AI, to solve today's and tomorrow's industry challenges.

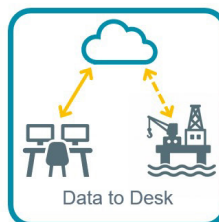

## Our Portfolio

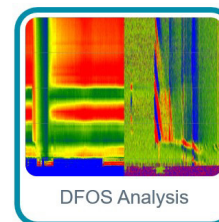

Caliper Logs

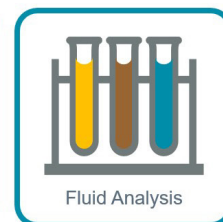

Cement Bond Logs

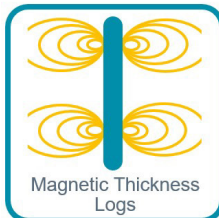

Data to Desk

DFOS Analysis

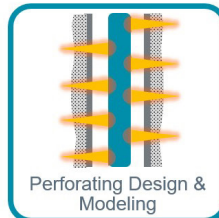

Fluid Analysis

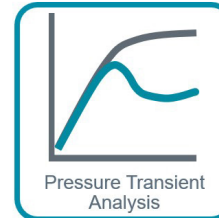

Magnetic Thickness  
Logs

P&T Survey Analysis

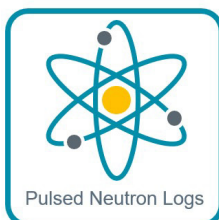

Perforating Design &  
Modeling

Pressure Transient  
Analysis

Production Logging

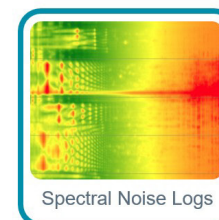

Pulsed Neutron Logs

Rate Transient  
Analysis

Reservoir Evaluation  
& Modeling

Spectral Noise Logs

Ultrasonic Logs
