

# E-Line Services

## E-Line Expertise, Operational Integrity, Trusted Partner

From routine production logging to advanced reservoir saturation logging and through to complex pump-down plug and perf interventions, Expro's E-Line capability is trusted to deliver the right outcome - even in the most challenging wells.

Our offering is defined by the breadth of our E-Line portfolio across the entire well lifecycle. From well commissioning and production optimisation through to well integrity diagnostics, remedial intervention and ultimately well decommissioning, Expro provides the tools, people and expertise to keep wells operating safely and efficiently - and to retire them responsibly when the time comes.

By combining advanced metrology with market-leading optimisation and well remediation technologies - and underpinning both with our operational expertise - Expro delivers both high-quality downhole data and the means to act on it. This integrated approach turns insight into intervention and intervention into maximised economic recovery.

### Key Applications

#### Well Surveillance

- Production Logging
- Reservoir Saturation Logging
- Cement Bond Logging
- Completion Integrity Logging
- Downhole Video
- Distributed Fiber Optic Sensing

#### Optimisation & Well Remediation

- Perforating
- Bridge Plug Services
- Pump-down Plug & Perf
- Thru-tubing Expandable Patches
- Tubing Punching
- Tubing Cutting

Expro's operational heritage is matched by our ability to perform in every environment. From conventional to unconventional wells, from HP-HT to depleted reservoirs, and from land to deepwater our specialist pressure control equipment, modular deployment systems and highly trained personnel ensure the same standard of performance and assurance worldwide.

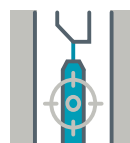

A key strength of Expro is our global fleet of deployment units - from compact, lightweight systems designed for the smallest offshore platforms to land-based logging trucks, giving operators maximum flexibility and efficiency in tailoring the E-Line intervention to the task at hand.

E-Line deployment unit types and capabilities

Type		7/32"	5/16"	Greaseless Cables	Hybrid Cables	Integral Logging Cabin

### Why choose Expro?

- Over five decades of E-Line Services heritage
- Comprehensive range of deployment systems
- Expansive range of products and services
- Global reach, rapid mobilisation and local execution
